

Save Time and Money on Your Forming Machine Maintenance with the New Quick Pick PM Kits from Formax®

Performing routine Preventative Maintenance on your Formax® forming machine plays a crucial role in optimizing the efficiency of your processing line. Ordering the proper parts before the shutdown is critical to a successful PM. This often requires searching through multiple Bills of Materials to identify the parts required, only to learn on the day of the PM that a needed part or two were missed during the ordering phase.

The Quick Pick PM Kits were developed by Formax® to simplify the PM process while saving you time and money. Quick Pick PM Kits offer key advantages over assembling a PM parts list yourself.

Easy to Do

The parts are ordered by a single part number for each Formax® forming machine. No need to search through the equipment Bill of Materials hoping to order the correct parts.

Efficient PM Process

Only the essential wear parts are included with each kit. The parts are shipped complete and ready for installation.

Cost Effective

Each Kit offers significant cost savings when compared against ordering each part separately.

Why struggle through another machine PM? Order your Quick Pick PM Kit from Formax® to ensure an effective machine PM while saving time and money.
